PROFESSIONAL EXPERIENCE

Mercado Libre

iOS Software Engineer • Apr 2023 – present

- Implementation of advertising solutions for the Mercado Libre and Mercado Pago apps, integrating multiple libraries.
- Implemented E2E and Snapshot (UI) tests to enhance code reliability and deliver high-quality features, reducing the potential for regressions.
- Focused on improving the user experience by enhancing the effectiveness of advertising campaigns, leading to increased user engagement.
- Ensured optimal system performance while validating the functionality of business rules, maintaining a robust and efficient application.
- Contribution to developing various features for the main banner on the Mercado Livre homepage.

Serasa

iOS Software Developer • Out 2021 – Apr 2023

- Built scalable and high-performance solutions for millions of users of the Serasa app within the Digital Wallet tribe.
- Led the development of the new payment flow, transitioning it from React Native to native iOS technologies using Swift.
- Responsible for implementing the first version of the Pix feature in the Digital Wallet.
- Led the iOS chapter to inspire discussions on improvements, encouraging developers to share projects and fostering innovation within the team.
